

Flare System Monitoring / Pressure Relieve Valve Monitoring

Customer Challenge

- One of the Refineries strategic initiatives is to reduce flaring to the minimum
- Energy costs are the largest costs at this refinery and valuable products (gasses) are wasted during flaring
- Unknown leakages are increasing cost of flaring
- Local image becoming critical for operations and the license to operate.

EMERSON Solution

- Plantweb Insight Software, including 708 sensing on their plant-wide WirelessHART network

Customer Benefits

- Reducing Leakage of valuable products
- Insight in flaring, explaining when and why they are flaring to the local community.
